

## **Impartiality Policy**

Our Impartiality Policy is the principle holding that decisions are based on objective evidence obtained during assessments, not on the basis of bias or prejudice caused by influence of different interests of individuals or other involved parties. Threats to impartiality are permanently identified, reviewed and controlled for safeguarding Impartiality. Impartiality is mainly assured by independence of staff, competence of hygiene auditors, competence of food safety and management system auditors, exercising due professional care in conducting the audits, collection of objective evidence and ensuring independent auditing and management system certification activities and decisions.
